Unchanged finite action: integrator and sampling diagnosis
C density, cell 0
CL − exact
Time step
lm-etd
heun
adaptive-euler
Auxiliary amplitude 2 (entire observable)
CL − exact
Time step
E=100, dt=.000625
Empirical survival
Reduced drift magnitude
heun
lm-etd
Nearest SP zeros: Re field=0, Im field=±2π
Density
Imaginary SP field amplitude
heun
lm-etd
