Numerical validation — quantitative PRL reproduction remains unestablished
Strong-field counterexample
Old spectral results now rejected
Mean height ⟨z⟩/$R_0$
Spectral CPU
Spectral CUDA
Direct CPU / CUDA
2D CL benchmark; no stabilization
Same-model MF
$\bar{N} = 10^4$, seed 51
$\bar{N} = 10^8$, seed 51
$\bar{N} = 10^4$, seed 52 (long)
Langevin Δτ (points offset)
PRL-parameter MF reference
z+ = 1, fixed counterions
z+ = 2, fixed counterions
z+ = 3, fixed counterions
z+ = 3, GC only
Polymer volume fraction $\phi_P$
z (nm)
